

About hempSAC

Designed for curing, storing, and odourless transporting, hempSAC bags are specifically designed to preserve the quality of harvested cannabis and cannabis-related goods while ensuring strong odour protection.

HempSAC products are FDA approved. The polyethylene film products used in its production, are suitable for products to be used in the production and handling of food and food-related materials.

HempSAC	↔	Nylon Bags
✓ proprietary formula designed to help protect and cure flowers and herbs	 made for	designed for transport and movement of dry contents
✓ protects contents from harmful uv rays	 uv protection	no uv protection
✓ strong moisture / humidity barrier	 humidity control	no humidity control
✓ no leaching	 plastic smell	can leach into the flower affecting taste and smell
✓ anti-static - contents won't cling to the bag	 anti-static	static - the flower and trichomes cling and breakdown
✓ great for curing and long-term storage of flowers	 product preservation	product breaks down in the bag lifting causes damage to flower, loss of cannabinoids and terpenes
✓ clip / tie / heat seal / clamp	 closure	tie bag but not air tight
✓ odor barrier, helps when transporting	 odor level	no odor protection, truckloads seized due to smell from container
✓ reusable. easy to clean FDA food-grade material	 environmental impact	reusable but must be cleaned thoroughly, mold forms in nylon weave
✓ stretch flexibility for high puncture resistance	 wear and tear	breaks down over time, punctures, tends to collect mold
✓ odor barrier reduces chances of rodents and critters	 rodent prevention	rodents can smell and chew through bag
